

# Image Resizing: How do I make my image 100x100 pixels? I need it as an avatar

## Thanks

Right now, the best way for you to do this is to crop the image first to a "1x1" ratio, using resizr. Then, save the image. THEN, upload it again, and resize the now-square image to 100x100 pixels.

Unique solution ID: #1018
