

Image Resizing: I have a website and I want to put resizr in it. Can you help me?

Probably not. Resizr is not available for license or sale. However, I might be willing to make it easy for users to get images from your site to resizr and back to your site.

Resizr is not my job, it's a side project. Therefore, my willingness to integrate with your site depends on the availability of my time, the size of your site, and whether you are willing to pay me for my time.
